TOWELRADS **ULTRA LST ANTI-LIGATURE**

Ultra LST Anti-Ligature is available with a choice of internal and external thermostatic valves. These valves are the emitter.

ACVK₁

External valve options available

ACVK2

HARVK₅

Fully dynamic thermostatic valve option with self-regulating adjustment

Available in White RAL 9010 as standard. Other RAL options available. Manufactured from 2mm heavy gauge steel as standard the Anti Ligature casing incorporates a true anti ligature punched mesh design with subsequent internal wall and floor fixings, the casing is also Class 0 Fire Rated for added protection.

Our unique secure radiator cover incorporates an Anti-Ligature punched mesh design. Punching perforations into the cover ensures there are no weak spots or potential for service users to detach or remove the mesh to create a ligature point.

Ligature points in Hospitals have been highlighted as a major concern; with Towelrads Ultra LST Anti Ligature range you have no need to worry.

Due to inconstancies in walls and floors, to make the cover completely anti-ligature, anti-pick mastic needs to be applied between the cover and wall/ floor. This can cause complications in the future with cleaning and maintenance. We have designed their removable front panel, secured with fixings to your specification, ensuring that this does not become a problem.

Options:

- Square, 30 degree and 45 Degree Sloping
- Removable front access panel for cleaning/maintenance.
- External TRV head options available upon request.
- Small TRV access for internal TRV's.
- Bespoke Designs to fit your requirements.
- ACVK1 kit for tamper proof, lockable internal solution.
- Standard RAL9010 other colours available.
- Anti microbial paint finish as standard.

FEATURES AND BENEFITS

- The Anti Ligature Ultra LST is available in 3 heights (500mm, 650mm and 800mm) and in eight lengths from 600mm to 2000mm wide, with the option of a plinth and a choice of 2 $\,$ TRVs (external as standard).
- · Internal Standard compact radiator EN442 certified including wall brackets
- · Two stage installation process meaning emitters can be initially installed and covers delivered to site only when required for second fix, reducing any storage on site and eliminating risk of
- · Casings can be retro fitted to existing radiator installations if necessary.
- · New wipe clean case design with no sharp edges
- 2mm Heavy Duty casing supplied as standard with Anti Microbial RAL9010 paint finish ensuring industry leading protection from bacteria and microbes

- · Casing also available in a sloping top finish as opposed to flat for added security if required.
- · Secure locking system to prevent unauthorised access to the internal TRV
- · Surface temperature below 43°C at Dt50 80°C/60°C/20°C or 75°C/65°C/20°C
- · Universal internal capillary TRV tamper proof capability
- One Single casing depth 160mm suits both T11 and T22 radiator types
- Outputs certified and CE marked to EN442, independently tested by EN442 accredited test laboratory
- · High pressure capability 10 bar working pressure
- · 5 year warranty on casing and 10 year warranty on the emitter.
- · Available with ½" BSP x 15mm angled tamper proof internal capillary TRV or or external options available on request
- · Vertical options also available on request
- · All casings UK manufactured
