

Contemporary industrial design for London's latest development

Supplied by **Towelrads**

CASE STUDY

Goodluck Hope sits in an enviable position on the banks of the river Thames, directly opposite the O2 Arena.

This flagship project from the Irish developer, Ballymore, is a prime example of stunning contemporary design with an industrial edge. Using a mix of blue and green façades, interiors feature bright, colour palettes interspersed with splashes of polished brass in both the kitchens and bathrooms.

Towelrads have worked with the M&E subcontractor, Borough Engineering, on every phase of the waterside development and supplied Multicolumn radiators, along with chrome and white towel rails, to the private and shared units.

This unique island development features an eclectic mix of contemporary buildings including suites, 1,2-, and 3-bedroom apartments, lofts and townhouses. With so many different plot types, most sizes throughout the project have been made to order with vertical and low-level radiators supplied, some up to 1.6m long.
